REPORT

of the

President and Directors

of the

# Atlanta and West Point Rail Road Company

to the

Stockholders in Convention

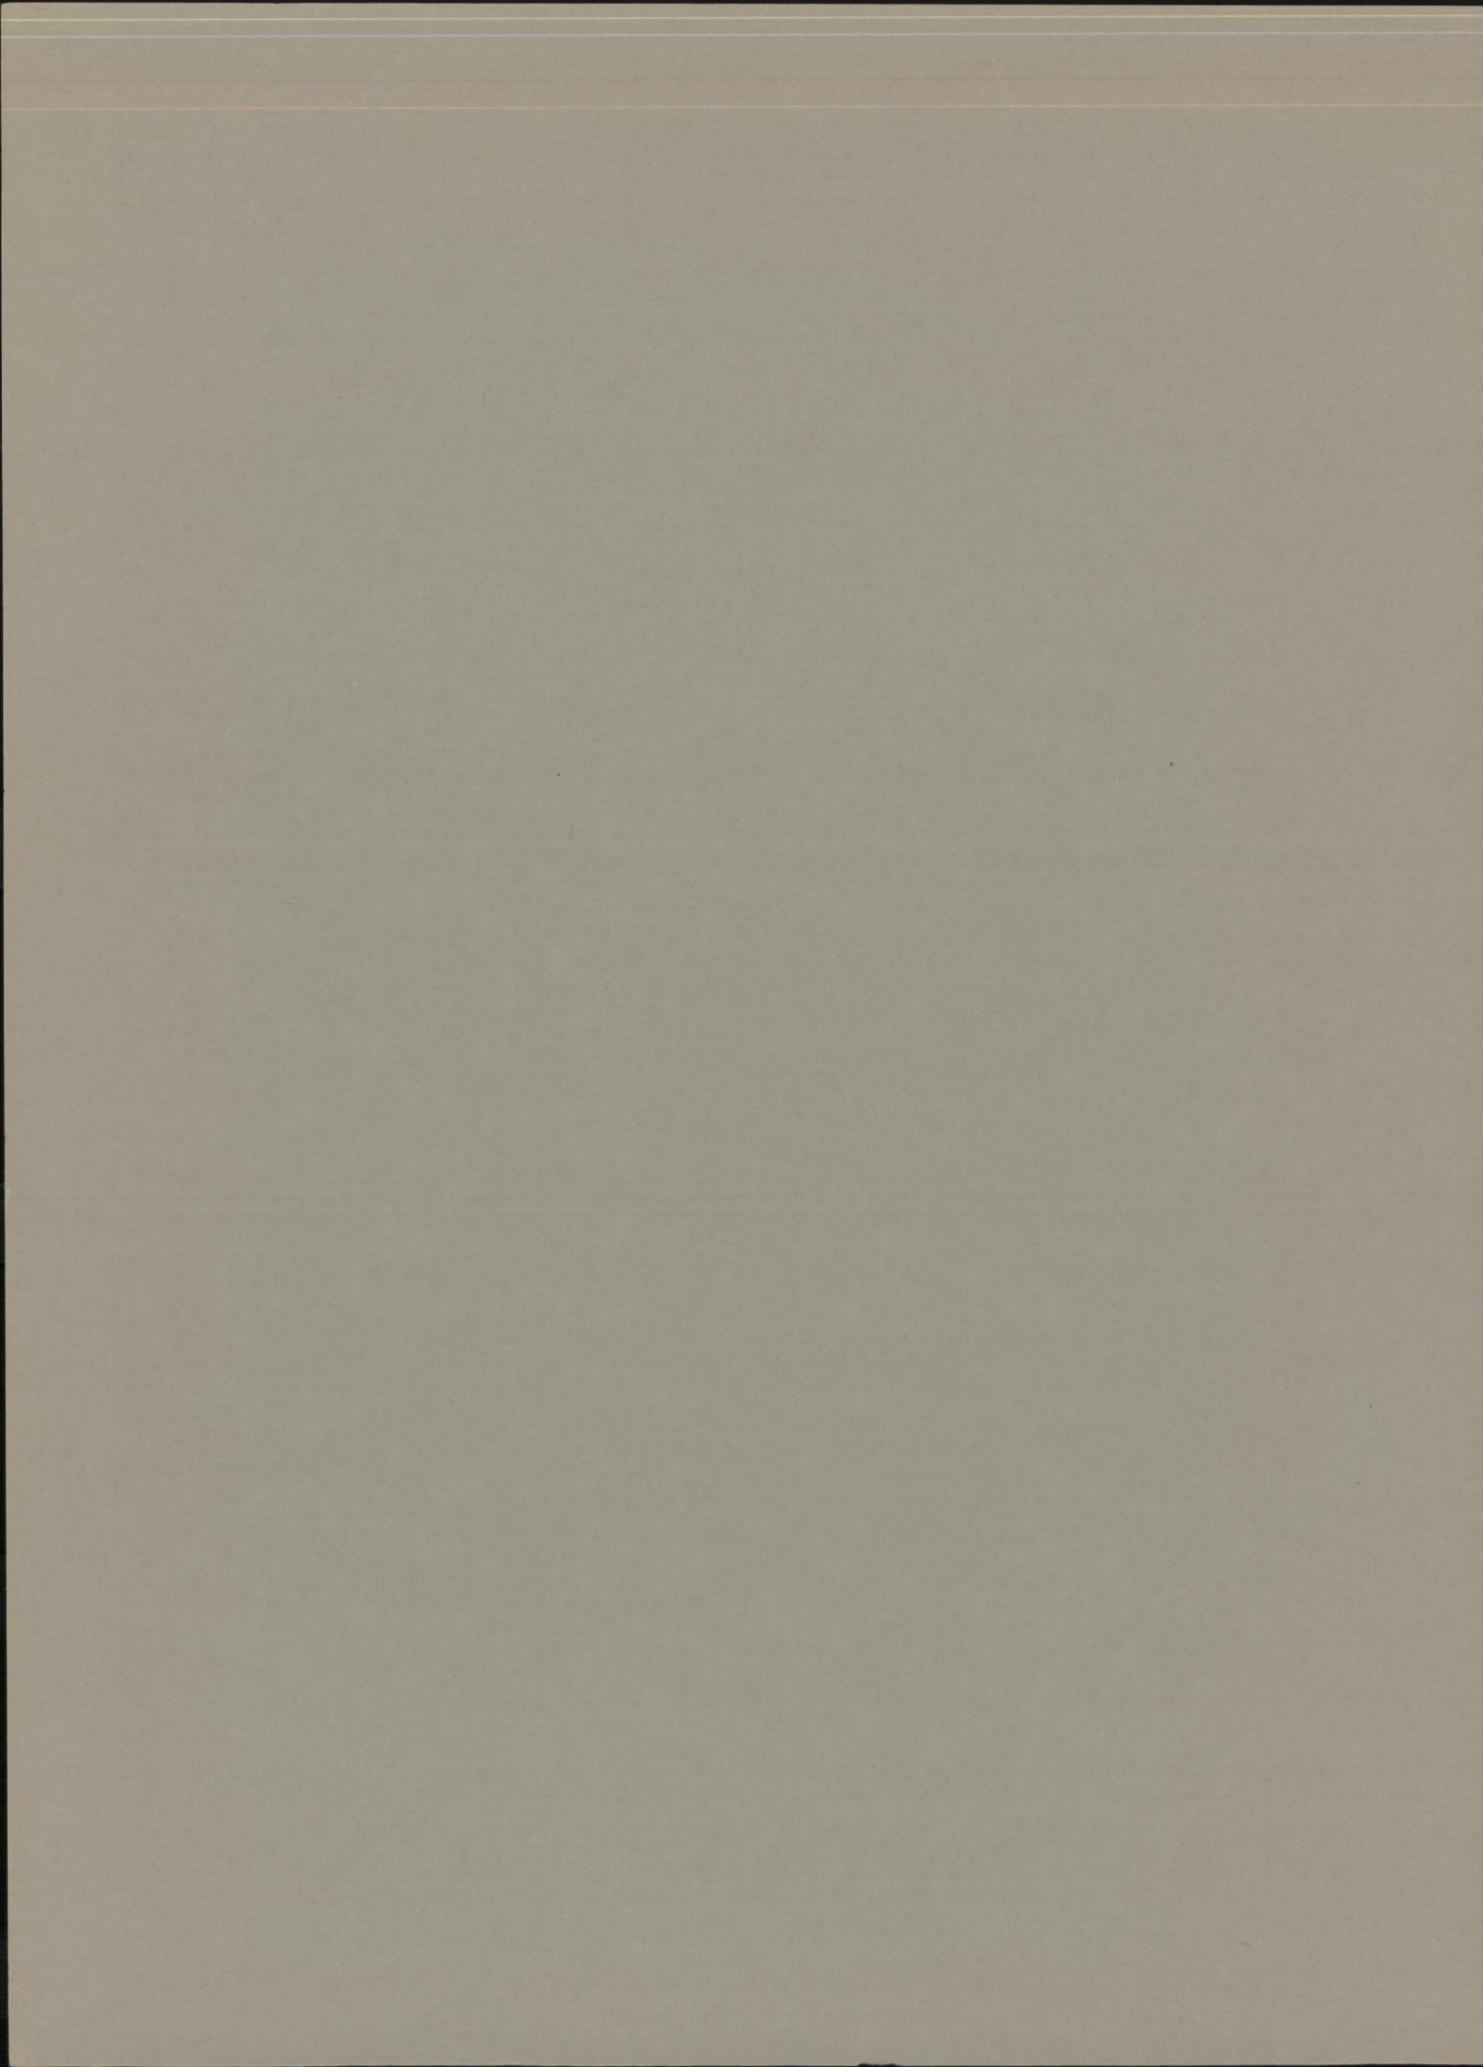

for the

Year Ended December 31, 1963

*Board of Directors*

J. ARCH AVARY, JR., *Atlanta, Georgia*  
EDWARD G. COLE, JR., *Newnan, Georgia*  
JOHN W. DENT, *Atlanta, Georgia*  
WILLIAM H. KENDALL, *Louisville, Kentucky*  
JOSEPH L. LANIER, *West Point, Georgia*  
J. CLYDE MIXON, *Atlanta, Georgia*  
CARL J. REITH, *Atlanta, Georgia*  
W. THOMAS RICE, *Jacksonville, Florida*  
SAMUEL R. YOUNG, *College Park, Georgia*

*Executive Committee*

WILLIAM H. KENDALL  
J. CLYDE MIXON  
W. THOMAS RICE

*The Staff*

J. C. MIXON, *President and General Manager*  
T. C. BULLARD, *Secretary and Treasurer*  
EDENFIELD, HEYMAN AND SIZEMORE, *General Counsel*  
B. A. CULPEPPER, *Comptroller*  
E. J. HALEY, *General Superintendent*  
MARSHALL L. BOWIE, *Director of Personnel*  
J. B. WILSON, *Chief Engineer*  
J. B. PACE, *Purchasing Agent*  
W. T. MARTIN, *Chief Traffic Officer*  
A. P. McELROY, *General Passenger Agent*

—Decrease.

## TO THE STOCKHOLDERS:

With only a small increase in freight business and a continuing decline in passenger train revenues your Company was still able to make some progress in 1963 over the year 1962. The generally stronger business outlook in the area during the closing months of the year gives promise of more favorable possibilities in 1964.

Your Company continues financially strong and well prepared to meet future needs.

This report presents a summary of operating data for the year 1963 and comparative statements of accounts as of December 31.

## EARNINGS

After fixed charges the deficit for the year amounted to \$1.35 a share compared to \$3.29 a share in 1962. Income increased 1.7% while charges against income increased only 0.2%. Equipment rent improved substantially but there was a decline in miscellaneous income resulting from non-recurring property sales in the year 1962.

## DIVIDENDS

Accumulations from earnings in former years justified a continuance of dividends.

Stockholders received a dividend of \$2.00 a share as of August 1, 1963, and \$2.00 a share as of December 20, 1963.

## OPERATING REVENUE

Operating revenues decreased \$13,355, or 0.4%. There were small increases in freight and mail revenue but passenger, express and miscellaneous revenues declined. Several aspects of this situation are discussed in other sections of this report. The operating ratio was at about the same level as last year, increasing only 0.5% to 88.86 in 1963. A substantial improvement would have been recorded except for the needed and profitable expenditures of approximately \$88,000 in a general equipment repair and upgrading program.

## FREIGHT

Freight revenue increased \$19,326, or 0.7%. The number of tons handled increased 1.58% but the average distance carried decreased 0.88%. Average revenue for handling a ton one mile increased 0.07%, slightly reversing the trend during recent years. We should hasten to say, however, that this is attributable to change in the classes of commodities handled as, along with other railroads, we continue under heavy

pressure to perform more service at lower rates against strong and unrelenting competition.

The increasing trend in the volume of basic commodities handled continued in 1963 but there was also an increase in manufactured products which is responsible for the small increase in our revenue per ton mile of freight handled.

Some interesting comparative statistics on tonnage, commodities and revenue will be found on pages 17 and 18 of this report.

Deserving especial mention is the decrease in number of loaded cars handled, as was also true of other roads in the southeast during the year, while the total number of tons handled increased. In 1963 loads handled decreased 1.96% but the number of tons of freight per car increased 3.7%. The revenue per ton remained the same.

More illustrative is a comparison of 1963 with 1956. The decrease in loaded cars handled in 1963 over 1956 was 14% while the number of tons of freight per car handled increased 16%. The revenue per loaded car handled increased 6% while the revenue per ton decreased 10.86% and revenue per ton mile decreased 17.87%. The provision of greater capacity equipment with incentive rates for heavier loads is only one of the devices employed to aid in closing the gap between operating costs and competitively priced transportation service.

Intense efforts to better serve our customers and merit all of their business we can properly handle are continuing. Piggyback service to all areas of the country where it can prove of value is being vigorously promoted. Specially designed equipment is being supplied to meet situations requiring its use. Service continues adaptable to requirements. Rate adjustments and various incentives are under constant study. The provision of facilities and service for new and expanding industries is an ever present consideration.

These and all other progressive measures are being constantly researched and employed. Combined with ever alert sales efforts they are designed to preserve and improve the position of your Company in the area it serves while actively promoting and developing its fine potentials for the future.

## PASSENGER, ALLIED AND MISCELLANEOUS

Passenger revenue decreased 8.5% in 1963 over that of 1962 as the number of passenger miles decreased 8.14%, thus continuing the long term trend which brings this source of income to its lowest point in many years. A leveling of revenue for the previous four years

had indicated a possible bottoming out of this business but the downturn was sharply resumed in 1963. Continuing highway development and better airline services, provided with the aid of large expenditures of public funds to which railroads are inequitably forced to contribute, result in reports of greater density of travel by those agencies as self supported rail service for passenger movements decline.

Mail revenue increased 3.6% in 1963 although it is increasingly difficult to prevent the diversion of such business to highways. Late in the year we installed some additional contract truck service to supplement trains.

Express revenue saw a further decrease of 6.2% in 1963 due to the installation of competing highway service by the express company to which we referred in our report for 1962. There is little reason to anticipate any improvement in this situation.

Mail and express revenues constitute 58.5% of the total income from passenger train operations.

The burdens of decreased revenue on our passenger trains have made it necessary to re-examine all elements of this service in an effort to curtail losses and preserve our resources. We anticipate some success in this direction during 1964.

Miscellaneous and incidental revenues decreased 9.0% due largely to a decrease in switching service requirements and an improved movement of cars resulting in smaller demurrage assessments.

### OPERATING EXPENSES

Expenses of operations continued under close control in 1963 and increased only 0.1% over 1962 although the amount of this increase was greatly exceeded by additional wage and fringe benefit payments resulting from national settlements of such questions. There were substantial reductions in the principal classes of expenditures, except for maintenance of equipment charges which increased as a result of the equipment upgrading program.

The utilization of mechanized track maintenance forces, the retirement of excess double main and side or industrial track in previous years made possible the maintenance of tracks with a smaller number of cross ties, less ballast, and reduced labor costs in 1963. During the year a tractor and bush hog for mechanically clearing right of way of undergrowth were added to the equipment for roadway maintenance as a further means of reducing costs.

Transportation costs decreased 2% although the number of tons of freight carried increased 1.58%. Comments have been made in another section of this

report about the increased loads per car which is one of the many devices that makes additional transportation at less cost possible.

The extension of radio communications in yard, train and roadway operations is proving a valuable aid in improving service at lower cost.

In our report last year we referred to a suit pending against a trucking company for casualty losses when one of our freight trains was struck by a tractor at a public road crossing late in the year 1961. Equipment and track damage in this accident amounted to approximately \$300,000. The jury in the case, which was tried in Richmond County, the home county of the trucking concern, found the truck operator responsible but awarded damages of only \$70,000. The difference in the serious loss was charged to retained income by permission of the Interstate Commerce Commission because it would otherwise have badly distorted normal operating statements.

### RAILWAY TAX ACCRUALS

Railway tax accruals increased \$695. Ad Valorem tax rates increased in the cities of Atlanta, Union City and LaGrange and in the counties of Fulton and Clayton.

Effective November 1, 1963 the base amount of earnings upon which Railroad Retirement tax is calculated was increased by congressional action from \$400 to \$450 a month for each employee. This will result in an annual increase in the amount paid by the railroad of approximately \$9,000.

### EQUIPMENT RENTS

Measures reported last year to improve adverse equipment rent balances became effective early in 1963 and by year end were resulting in a significant change. Although payments for private line car mileage continue high the improved utilization of our equipment as a result of the upgrading program and the purchase of some new heavy capacity box cars reduced our adverse balance by \$88,000, or 56.9%.

The upgrading program is continuing and we anticipate further substantial improvement.

### WAGE AND LABOR NEGOTIATIONS

The disputes between the railroads and their operating employees, involving the gradual elimination of firemen in freight and yard service and the modernization of various work rules, were before the United States Supreme Court at the end of the year. The Supreme Court dismissed an earlier case in 1963 and, in order to forestall strike action, the late President Kennedy cre-

ated an Emergency Board to consider the firemen and crew consist issues. The organizations refused to accept the findings of this Board, whereupon the President referred the matter to Congress in the face of further strike threats. Public Law No. 88 creating an Arbitration Board to handle these two questions was enacted with other questions being referred back to the parties for disposition, if possible, by February 25, 1964. This Board sustained, with few exceptions, the position of the railroads as to firemen and set up guide lines for determining the crew consist issue. Court action was again instituted by some of the organizations in an attack upon the validity of the law and this action is now pending. Further action on the secondary issues remain unsettled but negotiations are continuing.

At the end of 1962 there were unsettled negotiations concerning requests of shop craft federations for restrictive work rules. These remained unsettled in 1963.

During 1963 trainmen, engineers and firemen filed notices requesting wage increases and hospital-medical-surgical benefits. Engineers and firemen included life insurance in their request. These matters were all under negotiation at the close of the year.

In 1963 signalmen filed requests for increases in pay. From other non-operating groups came requests for increased pay, liberalization of hospital-medical-surgical insurance, and protective conditions growing out of coordinations. Counter proposals were filed by the carriers and the questions were all unsettled at the end of the year.

### CAPITAL EXPENDITURES

From 1946 through 1963, inclusive, expenditures for additions and betterments to road and equipment amounted to \$6,022,320, which is 80.4% of the total investment at the close of 1945. At the end of 1963 all debt for such purposes amounted to \$869,713, an increase in the year of \$110,506.

Other than the purchase of new 70-ton box cars, capital expenditures were limited to small miscellaneous items in 1963.

No new 115-pound rail was laid in main tracks in 1963 but at year end plans were in progress to lay some new rail in 1964.

### INDUSTRIAL DEVELOPMENT

This year has seen some quickening of interest in industrial locations, particularly in the rapidly growing vicinity of Atlanta. Two new industries now have buildings under construction in the Atlanta area. Rich's, Inc. have recently acquired twenty-five acres on the Atlanta

Belt and will soon begin grading operations in preparation for construction of a warehouse to serve their large operations in Atlanta.

A new plant for the manufacture of plastic products is under construction at Newnan. Four other new industries began business at various points on line and four others completed expansions.

In last year's report we referred to acreage adjacent to property owned by us at College Park. This area, consisting of 156 acres, all of which is in Clayton County, bounded on one side by the Circumferential Expressway and on another by the Airport Connector Expressway, owned by Real Estate Investment Trust of America, Inc., Boston, Massachusetts, has now been graded, will be known as South Perimeter Industrial Park and will be served by spur track from our line. The property is strategically located, and because of favorable tax rates in Clayton County, rapid development is anticipated.

Near the close of the year we contracted for the purchase of a 140-acre tract adjacent to our right of way at Fairburn, Georgia. This transaction was closed shortly after the first of the year and the area will be developed for industrial use.

General activity stimulated by more favorable tax considerations results in optimistic expectations for continuing rapid industrial expansion in our territory.

### GENERAL

The improvement in our operations under less than favorable conditions in 1963 causes us to look to the future with confidence in the presence of general indications of a high level of business activity. In the anticipated expanding economy the emphasis being placed upon progressive traffic solicitation, operating efficiency and industrial development should produce satisfying results.

At the last annual meeting Mr. Carl J. Reith, of Atlanta, became a member of your board of directors. As president of Colonial Stores, Inc., he brings to us a wealth of information and experience in merchandising.

On other occasions your attention has been called to the urgent need for legislation which would remove the shackles of inequality favoring other modes of transportation in a highly competitive market. Specifically last year we referred to President Kennedy's indictment of those inequities and proposals before Congress for remedial action. His appeals had their beginning in 1962. Now, two years later, bills representing steps in the right direction which have long been before Congress have been through formal hearings but are still languishing in committees.

The bills particularly referred to are H.R. 4700 and S. 1061, and H.R. 4701 and S. 1062. The first pair would extend to the railroads exemptions from minimum rate regulation in the transportation of agricultural, horticultural and fishery products and bulk commodities. The second pair cover amendments to various existing statutes designed to improve the national transportation system along lines proposed by the President. These bills have recently been consolidated by the

House Committee into one measure bearing designation H.R. 9903.

An expression of your views to your representatives in Congress in support of this bill will be helpful.

Again we express grateful thanks to our stockholders and patrons for their loyal support and to our officers and employees for their faithful and capable efforts.

By order of the Board of Directors,

J. CLYDE MIXON

President and General Manager

**MILEAGE OPERATED**

Miles of road operated at December 31, 1963:

**MAIN LINE:**

Atlanta to West Point.....	85.72

ACCOUNTANTS

**ATLANTA****ACCOUNTANTS' OPINION****Atlanta and West Point Rail Road Company:**

We have examined the balance sheet of Atlanta and West Point Rail Road Company as of December 31, 1963 and the related statements of income and of retained income for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

The Company maintains its accounts in conformity with the Uniform System of Accounts for Railroad Companies prescribed by the Interstate Commerce Commission and the accompanying financial statements have been prepared in accordance therewith. As explained in note 1, the provisions of such system vary in certain respects from generally accepted accounting principles.

In our opinion, with the exception referred to in the preceding paragraph, the accompanying financial statements present fairly the financial position of the Company at December 31, 1963 and the results of its operations for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

## CREDITS

Retained income, January 1, 1963.....	\$ 4,459,117.04
---------------------------------------	-----------------

## DEBITS

Net loss for the year .....	\$ 33,354.22
Loss sustained from truck-train accident near 83 mile post October 4, 1961 .....	217,458.90
Dividends to shareholders:	
\$2 a share paid August 1, 1963.....	\$ 49,272.00
\$2 a share paid December 20, 1963.....	49,272.00
	98,544.00
	349,357.12
Retained income, December 31, 1963.....	\$ 4,109,759.92

## NOTES TO FINANCIAL STATEMENTS

1. The provisions of the Uniform System of Accounts for Railroad Companies prescribed by the Interstate Commerce Commission vary from generally accepted accounting principles in that, under the Uniform System, no accounting recognition is given to the possible effect on income taxes in future years of prior years' reductions in income taxes resulting from the deductions (net) for amortization and depreciation of property for income tax purposes in excess of the amounts recorded in the accounts. The cumulative amount of such reductions in income taxes included in retained income at December 31, 1963 was \$472,000. In 1963 and 1962 the amortization was less than recorded depreciation, but this had no effect on income taxes because of a tax loss in both years.
2. The Company, together with Southern Railway Company and Central of Georgia Railway Company, jointly and severally guarantees unconditionally the payment of principal and interest of the first mortgage series A, 4% bonds of Atlanta Terminal Company due August 1, 1969, of which \$514,000 were outstanding at December 31, 1963.
